# What's waiting for you

→ **Study Programme**  
Here you can find an overview of your studies for the next 6 semesters: from clinical training, optional courses, master thesis, exams, elective term, to the end: the Federal exam.

→ **Master thesis**  
Writing a Master thesis is mandatory for all medical students, it completes the Master programme and it is a prerequisite for being admitted to the Federal exam.

→ **Your exams**  
You will be examined at the end of each of the clinical semesters. The examinations are structured to simulate and include both multiple-choice questions and practical examinations involving patient-actors (simulation of an objective structured clinical examination = OSCE).

→ **Federal exam**  
The Federal exam in medicine takes place upon completion of the 3-year Master of Medicine programme. Click the QR-code for a little taste of what your Federal exams will be like.

# Useful platforms and more

→ **iCorsi**  
It is our eLearning platform and allows lecturers and students to manage, share and access teaching materials, to manage communication between lecturers and students, and to create and conduct online examinations. The platform can be accessed with the edu-ID credentials.

→ **GESTU**  
This will be the platform you will use to view your personal weekly study plan, where you can unsubscribe from exams, view grades, and download useful certificates. The platform can be accessed with the edu-ID credentials.

→ **University Library Lugano**  
The library holds a wide collection of papers and electronic books, as well as periodicals in all areas of study.

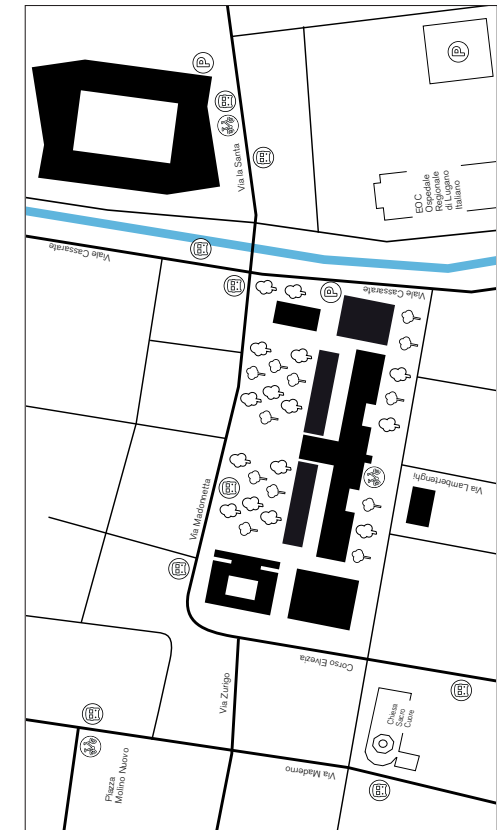

→ **AMBOSS**  
It provides you global access to a holistic platform for medical students to study for medical exams. You will receive a license for the platform at the beginning of your studies.

# Where we are

How to reach us, Campus maps, info about the cafeteria, study areas, wireless connection, copy center and the bike sharing station.
